M. A. NARAYANA IYENGAR,
District Magistrate.

SANITARY.

PROCEEDINGS OF THE CENTRAL SANITARY BOARD IN MYSORE.

READ—

Letter No. 5227, dated the 9th July 1918, from the Chief Engineer for Irrigation, forwarding estimate amounting to Rs 15,500 for improving the water-supply to the Magadi town (1) by sinking a new well near the Taluk Cutcherry, (2) improving the existing wells by deepening them whenever necessary and providing them with steining platform, parapet and pulley and in the case of two of the wells with Myers' hand pumps, (3) improving Gowrammanakere which is the main source of supply, (4) constructing a pond below the tank to be fed by percolation from the tank as also by a pipe sluice and, (5) laying 12″ glazed stoneware pipes to admit of the pond being drained and cleansed periodically.

Resolution No. 3, *dated* 26*th August* 1918.

Resolved that the scheme be approved and that the work of improving the existing wells and fitting them up with hand pumps be recommended to be carried out first, the remaining items of work being deferred for execution later as funds permit.

READ,—

Letter No. 4291, dated the 4th April 1918, from the Chief Engineer for Irrigation, forwarding for opinion three alternative projects prepared for water-supply to Tiptur and enquiring whether, in view of the fact that the scheme for taking water from the Sivara tank is much too costly, the springs in one of the deep wells in the town may not be tested with the boring plant.

2. Letter No. 2822, dated the 15th May 1918, from Mr. A. M. Sen, M.Sc., M.I.M.E., F.G.S., Assistant Geologist, stating that according so Dr. Smeeth a deep well near the tank in a line with the Railway Station road sunk to a depth of 100 feet and about 8 feet in diameter would yield water sufficient in quantity to supply the town and that it would be worth while to try this scheme instead of undertaking the other one of getting the supply from the Sivara tank.

Resolution No. 1, dated 16th August 1918.

Resolved that the scheme for watersupply from Sivara tank, although costly, is the most suitable one. The Board agree in the opinion expressed by the Municipal Council, Tiptur, that the adoption of the scheme may be deferred for some time owing to the prohibitive prices of materials at present.

READ—

Letter No. 5867, dated the 13th May 1918, from the Chief Engineer for Irrigation, forwarding a project amounting to Rs. 76,450 for water-supply to Bowringpet town, the proposal being, to pump water from a suction well below the tank through pressure filters to a service reservoir on the ridge to the north of the town and distribute therefrom through cast iron and wrought iron pipes and fountains.

Resolution No. 2, *dated* 16*th August* 1918.

Resolved that the project be approved.

T. V. ARUMUGUM,
President.
